

August 2021

## Price Increase

Due to the current high demand and market prices of materials, we are forced to apply a 15% increase to the cost of our products. This price change will go into effect **Sunday, August 1st, 2021**. All orders submitted from **the effective date** must include the price change, this would also apply to previously quoted buildings that fall outside of the 15 day quote window.

Our goal is to continue to provide you with economically sound pricing, without compromising the quality of the materials that we are most distinguished for.

Please be assured that this is not a profitable advancement by us, and that it's a necessary measure to accommodate the industry-wide fluctuating market costs of materials.

We ask that you check our online **Price Book** (<https://www.randbmetalstructures.com/literature/>) or our **3D Design Builder** (<https://idearoom.randbmetalstructures.com/>) for the most up to date pricing.

We will continue to monitor lead times and keep you up to date at [www.randbmetalstructures.com/lead-times/](http://www.randbmetalstructures.com/lead-times/).

We appreciate your understanding and your continued support.
